OBAVIJEST

Dana **14.11.2017.** u **13:15 sati** održat će se na Geofizičkom odsjeku PMF-a
sljedeće izlaganje:

Dr Ferenc Ács

(Department of Meteorology, Eötvös Loránd University, Hungary)

Education of agroclimatology at ELTE: a review with special focus on grape

ABSTRACT: Course „Agroclimatology” taught in scope of the ELTE’s meteorological MSc education is briefly reviewed. The course is strongly multidisciplinary and earth-science oriented. After introducing basic theory related to cultural vegetation (crop) and its environment, the scientific methods for treating crop-environment interactions (e.g. long term field experiments, agroclimatological models) are briefly considered. Special attention is devoted to those crops which determined human civilisations (China: rice based civilization, Europe: wheat based civilization). At the end, the human – vine coexistence aspects will also be considered because of its speciality.

Pozivaju se studenti, absolventi i svi zainteresirani da prisustvuju predavanju, koje će se održati u **predavaoni P2** Geofizičkog odsjeka PMF-a, Horvatovac 95, Zagreb.
