

INFOBIP WINTER INTERNSHIP

Dear students,

We are pleased to announce the Winter edition of three different internship programs organized by Infobip in 2023. Apart from the fact that you will be able to acquire theoretical and practical knowledge with the support of mentors from various fields, after completing the program, there is a possibility of employment in a global IT company.

Gain practical experience. **Learn** from experienced mentors. **Create** the first step towards a career in data and analytics. Never stop **playing**.

Who is Infobip?

At Infobip, we value creativity, persistence, and innovation. Since 2006, we have been innovating at the edge of technological possibilities and are now shaping global communications of the future. With a communications platform that reaches 7+ billion transactions monthly and 4+ billion devices worldwide, we ensure you can connect with your favorite brands through your preferred channels.

If you are a student of graduate studies or final year of undergraduate studies in the field of business and/or IT, looking to gain practical experience in a real global IT company standing behind a solution that reaches 70% of Earth's population, join our internship program and get a chance to land your first job at Infobip!

What's in it for you?

- Possibility to land your first job – Every intern that is selected for the program will have a chance to get a job offer at the end of the internship, based on progress and evaluation during the program.
- Paid internship – Our internship is a paid program.

- Cutting-edge technology & processes – Get a chance to use the most widely used CRM – Salesforce, play with Qlik Sense and design dashboards with a robust cluster of servers behind it, and crunch data on top-notch cloud data management platform (e.g., Microsoft Azure data services, Databricks, RStudio/Python)
- Learn as you grow – You will learn through practical work on your project and get continuous feedback from your mentors, helping you improve and progress.
- More Infobip perks if you join us after the internship – structured onboarding, Orientation week, education budget, rewards and bonuses, a team taking care of all the equipment you need, company team buildings and other organized activities, the company library, access to the world leading MOOC (Massive Open Online Course) platform Udemy as well as multitude of both internal and external learning materials, organized sports, free lunch at our campuses in Zagreb and Vodnjan...

About program:

Below you can read basic information about each program and application. Also, we kindly recommend a visit to our [Internship web page](#).

Software Engineering Internship

- Locations: Zagreb, Rijeka, Vodnjan.
- At our 7 weeks paid internship program you will learn about different technology stacks based on your interest, work with Java, Spring, Spring Boot, Javascript (React or Vue) or C#, .NET Core, contribute to your team services and directly impact the quality of our products, write well designed, testable, and scalable code in accordance to clean code principles, learn the importance of testing and High Availability, monitoring, metrics, and logging, use technologies you need to put your code to action such as Git, Maven, and Jenkins and many more.
- All students in bachelor's and master's final years can apply.
- Direct links for application on the **Software Engineering Internship** can be found [here](#).
- The internship start date is the **6th of February 2023**.

Application Security Internship

- Locations: Zagreb.
- At our 7 weeks paid internship program you will familiarize yourself with OWASP Top 10 and/or SANS 25, consult development teams on how to fix their code based on vulnerabilities, perform code reviews, perform active testing of Infobip services, learn how to perform security reviews and issue triage, how to work with CI/CD pipelines, about SDLC in Infobip, about different technology stacks based on your interest, work with Java, Spring, Spring Boot, Javascript (React or Vue) and C#, .NET Core, etc.
- All students in bachelor's and master's final years can apply.
- Direct links for application on the **Application Security Internship** can be found [here](#).
- The internship start date is the **6th of February 2023**.

Data & Analytics Internship

- Locations: Zagreb.
- At our 6 weeks paid internship program you will learn about business processes and cross-departmental cooperation around data topics, work with enormous amounts of data and get introduced to end to end flow of how we obtain, manipulate, and use that data, work with major business (intelligence) software like Microsoft Azure, Databricks, RStudio/Python, Qlik

Sense, Salesforce, contribute to your team's services and directly impact the quality of our products, etc.

- All students in bachelor's and master's final years can apply.
- Direct links for application on the **Data & Analytics Internship** can be found [here](#).
- The internship start date is the **6th of February 2023**.

“

“An egoless and humble mentality, the idea that we're just starting, the thought of being crazy artists who learn by doing - that's the culture we've built together.”

Silvio Kusic
CEO

We are looking forward to meeting you!
